- Current System Functionality
- The Way Ahead

# The Problem (Worth Solving)

There is no single source of actionable injury, occupational illness, mishap, environmental, and compliance information for the DOD enterprise.

# The Solution to the Problem

- An Enterprise-Wide decision support system to offer a total picture of injury causes through the integration of DoD Mishap, Personnel & Injury Data
  - Objective
    - Provide a single view of DoD-wide mishaps, corresponding injuries and medical cases
  - Benefits
    - Provides consistent and accurate answers to internal and external data calls (i.e. SECDEF data calls on specific injuries, COCOM data calls for joint mishap data, and media calls to identify mishaps information for recent events (i.e., Rollovers))
    - Provides mishap-reduction decision support information to unit commanders, supervisors and managers

## Defense Safety Enterprise System

[Home](#) | [Help](#) |

Welcome to DSES, the Defense Safety Enterprise Systems. DSES has been developed to be the DoD's single, authoritative decision support system that provides timely and actionable injury, occupational illness, mishap, environmental, and compliance information on workforce and workplace to supervisors at all levels of the organization.

Read the [Secretary of Defense memo](#) regarding Reducing Preventable Accidents.

This is a Department of Defense computer system. This computer system, including all related equipment, networks, and network devices (specifically including Internet access), is provided only for authorized U. S. Government use. DoD computer systems may be monitored for all lawful purposes, including to ensure that their use is authorized for management of the system, to facilitate, protection against unauthorized access, and to verify security procedures survivability and operational security. Monitoring includes active attacks by authorized DoD entities to test or verify the security of this system. During monitoring, information may be examined, recorded, copied, and used for authorized purposes. All information, including personal information, placed on or sent over this system may be monitored. Use of this DoD computer system, authorized or unauthorized, constitutes consent to monitoring of this system. Unauthorized use may subject you to criminal prosecution. Evidence of unauthorized use collected during monitoring may be used for administrative, criminal, or adverse action. Use of this system constitutes consent to monitoring for these purposes.

 Refresh Report 

The Service Metrics report provides safety and mishap data for the top five metrics for each level of granularity. The number in parentheses represents item counts for the specified population at risk. The Rate column for Aviation Class A Mishaps is broken down by service. You may drill down the chain of command hierarchy and view item counts for each unit and all its subordinates. The number in parenthesis in each column, Safety Mishaps and PMV Fatalities are calculated using Active Duty

# The Way Ahead

- Near Term
  - Automated feed of Standard Data from Safety Centers
  - Validate remaining Service data (USAF, USN & USMC)
  - Improve ADCON Chain-of-command (UIC Structure)
  - Improve User Interface and incorporate user feedback
- Continue to pursue a world-class mishap reporting and prevention architecture for the Department
  - Define the common business processes
  - Continue to define joint requirements for actionable metrics for leadership and identify impediments to a common system approach
- Integrate Standard Data Elements
  - Services to collect Standard Data Elements
